

PSYMON SEZ ARCEDERA

Software Engineer | AI-Powered Products & Enterprise Systems | UPLB CS · DOST Scholar

Computer Science graduate from the University of the Philippines Los Baños specializing in software engineering, with production experience across startup and government environments. Ships end-to-end features, integrates LLM systems, and collaborates across cross-functional teams.

San Pablo City, Laguna, PH | (+63) 9983441138 | psarcedera@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EXPERIENCE

Ten X Development

September 2025 – May 2026

AI Software Developer Intern

- Developed 3 of 5 core features for AI-powered interactive kiosks deployed across 5 mall locations in Metro Manila, including pose detection-driven experiences, boosting consumer engagement with telecom products and services at scale.
- Engineered 6 core modules for a full-featured admin dashboard for a major food chain client — covering orders, menu, inventory, products, customers, and settings — enabling real-time operational control and significantly reducing manual overhead.
- Drove in-house AI development through prompt engineering and rigorous response evaluation, optimizing LLM outputs for accuracy, consistency, and reliability across core use cases.
- Maintained system stability across multiple production environments through proactive bug fixing and cross-functional collaboration, ensuring consistent performance and on-time delivery.
- Authored and maintained technical documentation for critical system workflows, streamlining team knowledge sharing and improving onboarding efficiency.

Department of Science and Technology

June 2025 – August 2025

Software Developer Intern

- Built and deployed a full-stack prototype web application consolidating records of 10 government offices and facilities into a single centralized interface, serving staff across multiple DOST regional divisions.
- Implemented 3 core workflows — record creation and updates, search and filtering, and detail views — iterating on usability based on stakeholder feedback to deliver a polished, production-ready system.
- Translated stakeholder requirements into functional features end-to-end, conducting iterative testing and maintaining thorough documentation for long-term maintainability and handoff.

PROJECTS

ICS-ASTRA

PostgreSQL · Next.js · React.js · Express.js · Vercel | Backend Developer | [GitHub](#)

- Implemented session-based authentication and role-based access control (RBAC) to secure the application and deliver personalized access across multiple user roles, supporting an alumni network spanning multiple graduation batches.
- Built optimized search and filtering for alumni and job records using indexed database fields, significantly improving query performance and reducing retrieval time for large record sets.

Modeling Merit: Identifying Factors For Scholarship Evaluation Using Naïve Bayes Classifier

Published on SSRN | Proponent | [SSRN](#)

- Built an end-to-end Naïve Bayes classification pipeline to estimate eligibility from student attributes.

EDUCATION

Bachelor of Science in Computer Science

2022 – 2026

University of the Philippines Los Baños · Los Baños, Laguna

GWA: 1.4

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C

AI: Prompt Engineering, LLM Integration, Pose Detection

Frameworks: React, Next.js, Laravel, Tailwind CSS, Express.js

Methodologies: Agile, Test Automation, SDLC

Databases: PostgreSQL, MongoDB, MySQL, Supabase

Soft Skills: Leadership, Communication, Initiative

Tools: Docker, REST APIs, Git, Vercel, Railway, GitHub

AWARDS

Honor Society of the Philippines – Nominee

2026

Nominated for outstanding academic performance, ranking within the top 10% of the batch.

DOST-SEI Merit Scholar

2022

Department of Science and Technology – Science Education Institute
