

PSYMON SEZ ARCEDERA

Software Engineer | AI-Powered Products & Enterprise Systems | UPLB CS · DOST Scholar

Software engineer and Magna Cum Laude graduate from the University of the Philippines Los Baños, with production experience across startup and government teams. Builds end-to-end web and mobile products and integrates LLM features into production applications.

EXPERIENCE

Ten X Development

September 2025 – May 2026

AI Software Engineer Intern

- Developed 3 of 5 core features for AI-powered interactive kiosks deployed across 5 mall locations in Metro Manila, including pose-detection experiences that let shoppers engage with telecom products through hand movement.
- Engineered 6 modules of a food-chain admin dashboard — orders, menu, inventory, products, customers, and settings — giving operators real-time control over daily operations.
- Improved in-house LLM features through prompt engineering and systematic response evaluation, raising output accuracy and consistency across core use cases.
- Resolved 40+ bugs across 3 production projects through proactive debugging and cross-functional collaboration, keeping systems stable and releases on schedule.

Department of Science and Technology

June 2025 – August 2025

Software Developer Intern

- Built and deployed a full-stack prototype web application consolidating records of 10 government offices and facilities into a single centralized interface, serving staff across multiple DOST regional divisions.
- Implemented 3 core workflows — record creation and updates, search and filtering, and detail views — iterating on usability from stakeholder feedback to ship a production-ready system.
- Translated stakeholder requirements into functional features end-to-end, conducting iterative testing and maintaining thorough documentation for long-term maintainability and handoff.

PROJECTS

ParaLink

React Native · Expo · TypeScript · Firebase · Google Maps API · OSRM | Full Stack Developer | [GitHub](#)

- Built ParaLink, a cross-platform mobile app that digitizes San Pablo City's jeepney network — bringing real-time route mapping, automatic fare computation, and live passenger counts to a transit system that traditionally runs with no rider-facing technology.
- Integrated Google Maps API and OSRM for route visualization and turn-by-turn routing; earned a System Usability Scale score of 91.1 ("Best Imaginable") in user testing.

ICS-ASTRA

Supabase · Next.js · Tailwind CSS · Node.js · Digital Ocean · CASL | Backend Developer | [GitHub](#)

- Implemented session-based authentication and role-based access control (CASL) to secure the application and deliver personalized access across multiple user roles, supporting an alumni network spanning multiple graduation batches.
- Built optimized search and filtering for alumni and job records using indexed database fields for fast retrieval across large record sets.

EDUCATION

Bachelor of Science in Computer Science

2022 – 2026

University of the Philippines Los Baños

Magna Cum Laude (GWA: 1.44)

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C

Frameworks: React.js, Next.js, Node.js, Tailwind CSS, Express.js

Databases: PostgreSQL, MongoDB, MySQL, Supabase

Tools: Docker, REST APIs, Git, Vercel, Railway, GitHub

AI: Prompt Engineering, LLM Integration, Pose Detection

Methodologies: Agile, Test Automation, SDLC

AWARDS

Honor Society of the Philippines – Nominee

2026

Nominated for outstanding academic performance, ranking within the top 10% of the batch.

DOST-SEI Merit Scholar

2022

Department of Science and Technology – Science Education Institute
